

ÁNGELA DEL PILAR CENTELLES INSA

Full-Stack Web Developer | Web Designer | Digital Illustrator

anceninpil@gmail.com | 606 424 646 | [linkedin.com/in/angelapci](https://www.linkedin.com/in/angelapci) | angelapci.vercel.app | github.com/annvals | O Porriño, Pontevedra

PROFESSIONAL PROFILE

Full-stack developer with a hybrid technical-creative profile, holding a Higher Degree in Web Application Development (DAW) and a Bachelor's Degree in Fine Arts. Specialized in modern frontend development (React, Angular, Vue 3), Node.js backend, and SQL/NoSQL databases, with practical experience using AI tools to enhance the development workflow. I build complete web applications from prototype to production deployment, focusing on solid architecture, performance, and thoughtful design. All my projects are open source, and I have experience working in real professional environments using agile methodologies.

PERSONAL PROJECTS

DocMind (Mar 2026) · Open Source

Web application for chatting with PDFs using fully local AI, without external APIs or token costs.

- Decoupled architecture: Vue 3 frontend with Pinia and Vue Router (Vite), Node.js/Express backend with pdf-parse for text extraction.
- Integration with Ollama (local llama3.2): chat with conversation history and five extraction modes (summary, key points, entities, tables, custom).
- Interactive visual schematic tree with recursive collapsible structure. Reusable composable system: useToast (global notifications), useConfirm (custom modal instead of window.confirm) and usePdfViewer (wrapper around PDF.js).
- Internationalization in 11 languages with browser auto-detection, drag & drop PDFs upload and export to Markdown and printable PDF.

Technologies: *Vue 3 · Pinia · Vue Router · Vite · Node.js · Express · Ollama · llama3.2 · PDF.js · vue-i18n · Marked.js*

Gallifrex (Mar 2026) · Open Source

Personal finance web application developed as a complete revision of my final project (TFG).

Manages income, expenses, budgets and categories with multi-currency support and i18n in 7 languages.

- Decoupled architecture: Angular 21 frontend (signals, standalone) on Vercel, Node.js/Express backend on Render, PostgreSQL database on Neon.
- Multi-currency system with real-time conversion using Frankfurter API, cached exchange rates and EUR storage in database.
- Data visualizations with Chart.js: cash flow line chart, category donut chart and budget bar chart
- Responsive UI with SCSS, glassmorphism theme and optimized mobile UX.

Technologies: *Angular 21 · TypeScript · Node.js · Express · PostgreSQL · Neon · Chart.js · JWT · SCSS · Vercel · Render · Vitest*

BacklogVault (Feb 2026) · Open Source

Web application to automatically import a user's Steam library and manage their video game backlog.

- Integration with Steam API and RAWG API to automatically import game libraries.
- Backlog management with status tracking, filters and personal progress monitoring.
- Decoupled architecture: frontend deployed on Vercel, backend on Render and PostgreSQL database on Neon.

Technologies & tools: *React 18 · TypeScript · Vite · TanStack Query · Zustand · Framer Motion · Node.js · Express · PostgreSQL · Neon · Vercel · Render*

PROFESSIONAL EXPERIENCE

Web Developer | F10 Informática (Sep 2025 – Dec 2025)

- Developed web applications using Genexus and Oracle, completing 100% of the assigned module within the deadline following agile methodologies.
- Integrated AI tools to optimize workflows and accelerate development tasks.

Technologies & tools: *Genexus · Oracle · Microsoft Office · Excel · Scrum · IA*

Full-Stack Developer – Gallifrex Project | CPIFP Bajo Aragón (Jun 2025 – Sep 2025)

- Developed a complete full-stack application using MVC/Laravel, JavaScript, Bootstrap and CSS. Implemented Docker deployment, CI/CD with GitHub Actions, i18n and REST APIs.
- Managed the entire development lifecycle: prototyping (Figma), development, testing and production deployment.

Technologies & tools: *React · JavaScript · TypeScript · Node.js · Bootstrap · CSS3 · Docker · GitHub Actions · Vercel · REST API · i18n · Figma*

EDUCATION

Higher Degree in Web Application Development (DAW) – CPIFP Bajo Aragón | 2023 – 2025

Bachelor's Degree in Fine Arts – Universidad Complutense de Madrid / Universitat de Barcelona | 2016 – 2020

TECHNICAL SKILLS

Frontend: Angular, React, Vue 3, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, SCSS, Vite, Pinia, Vue Router, vue-i18n, TanStack Query, Zustand, Framer Motion, Chart.js, PDF.js, Marked.js

Backend: Node.js, Express.js, Ollama (llama3.2), Python, PHP, Java, Laravel/MVC, Genexus

Data Bases: PostgreSQL, MySQL, Oracle, MongoDB, PL/SQL, REST API, Neon

DevOps & Tools: Docker, Linux, Apache, Nginx, GitHub Actions, CI/CD, Vercel, Render, Git, VS Code, Postman, Figma, Jira, Scrum, TDD, Vitest, Jest

Design & AI: Photoshop, Illustrator, Clip Studio Paint, Procreate, Canva, GitHub Copilot, Claude AI

LANGUAGES & OTHER

Spanish and Catalan (native) | English (C1 Cambridge) | French (B1) | Japanese (N5) | Galician (beginner)

OPEN SOURCE ACTIVITY

All my personal projects are published on GitHub (github.com/annvals) as open source, with detailed README documentation and installation instructions. I strongly believe in knowledge sharing and the visibility of technical work as an essential part of professional growth in software development.
